

CITY OF FERNDALE

Ferndale Water System Emergency Intertie

ADDENDUM NO. 2 (2 pages total)

Issue Date: August 29, 2022

General: Recitations of each and every section of the bid documents impacted by this addendum are not given. The described changes impact all relevant portions of the bid documents whether specifically cited below or not.

CLARIFICATIONS AND REVISIONS

1. Specification Section 00 24 13 SCOPES OF BIDS is clarified as follows:

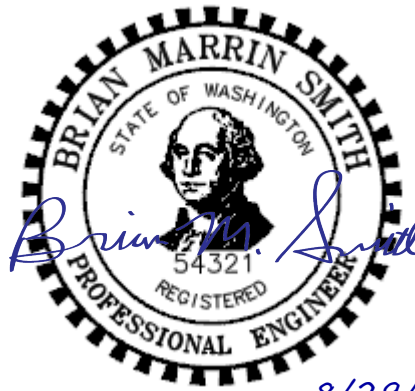

- a. 5. Remove and Reinstall Signs: clarify that the unit price for this item also includes compacted import backfill.
- b. 6. Remove and Reinstall Mailboxes: clarify that the unit price for this item also includes compacted import backfill.
- c. 7. Remove and Reinstall Culvert: clarify that the unit price for this item also includes compacted import backfill.
- d. 17. 10-inch Buried Gate Valve: clarify that the unit price for this item also includes compacted import backfill.

Also, note that the anticipated approximate bid quantity for the project will now be 1 EA instead of 2 EA because City of Bellingham will provide and install one of the two 10-inch gate valves (as described in Addendum 1). Bidders shall leave the bid proposal form unchanged showing a quantity of 2 EA for the purposes of bidding, but this serves to clarify the intent that a valve provided and installed by City of Bellingham will not be included in payment of quantities for Contractor.

- e. 18. 12-inch Buried Butterfly Valve: clarify that the unit price for this item also includes compacted import backfill.
- f. 19. 16-inch Buried Butterfly Valve: clarify that the unit price for this item also includes compacted import backfill.
- g. 20. Hydrant Assembly: clarify that the unit price for this item also includes compacted import bank run gravel backfill for the hydrant gate valve, 6" diameter hydrant lateral pipe, and backfill around the hydrant.
- h. 21. Bollards: clarify that the unit price for this item also includes compacted import backfill.
- i. 22. Combination Air/Vacuum Relief Valve Assembly: clarify that the unit price for this item also includes compacted import bank run gravel backfill for the associated piping and meter box.
- j. 32. Trench Backfill: Bank Run Gravel and 33. Trench Backfill: Crushed Surfacing Top Course / 5/8"-Minus:

For both of these bid items, clarify that they only apply to trenching for water mains. Trench backfill for other items (e.g. remove and reinstall culvert, new culvert, hydrant assembly, buried valves, bollards, air/vacuum valve assembly, sample station assembly, vaults, vault drain piping, remove and reinstall signs and mailboxes) is included in their respective bid items.
